25TH Anniversary Table Item Descriptions

- **Kimber 84m 6.5 Creedmoor Bolt Action Rifle** - This Kimber Model 84M Classic is a bolt-action hunting rifle chambered in the awesome 6.5 Creedmoor caliber. The rifle features a 22-inch barrel, a one-inch thick Pachmayr Decelerator recoil pad and weighs about 5.5 pounds. Common features of the Model 84M include a match grade barrel for accuracy and a target crown, which helps maintain barrel harmonics so the rifle doesn't vibrate too much and throw off the round's trajectory. The bolt has a Mauser claw extractor that ensures when the bolt is pulled back the spent casing ejects effortlessly. And, it has an adjustable trigger that can be set at 3.5 to 4-pounds.
- **Kimber Custom Crimson Carry II .45 ACP Auto Pistol** - Featuring Kimber's handsome two tone option, a match grade frame, slide, barrel, bushing and chamber all of which result in an accurate, reliable full-size lightweight pistol. Includes match grade trigger and front and rear serrations. Crimson Carry pistols have a lightweight aluminum frame for all-day-every-day carry and Crimson Trace Lasergrrips add a tactical advantage. The Custom Crimson Carry II is a full-size lightweight pistol ideal for personal protection or duty carry.
- **Daniel Defense DDM4v11 "Tornado" AR Rifle** - The Daniel Defense M4 Carbine V11 features the KeyMod system integrated in the new SLiM Rail™ (Slim Lightweight Modular) which is a recoil resistant, two-part, direct attachment method for accessories that offers outstanding "return-to-zero" when accessories are removed and reinstalled. The DDM4v11 is offered in the 5.56 NATO round and is equipped with a free-floating, Cold Hammer Forged, 16" Government profile barrel and the newly designed, rugged and comfortable Daniel Defense Buttstock and Pistol grip. This rifle is finished in Daniel Defense Tornado™ Cerakote™.
- **Ruger .308 Enhanced Precision Bolt Action Rifle** - Ruger's Precision Rifle Bolt-Action Rifle takes customization and long-range accuracy to a whole new level. Comes with a billet-aluminum bolt shroud, short-action handguard that increases scope clearance and a hybrid muzzle brake that minimizes felt recoil. Ruger Precision MSR stock with QD sling mount, bottom Picatinny rail and soft rubber butt pad. Muzzle brake reduces felt recoil by up to 58%, enhancing accuracy by reducing shooting fatigue during longer strings of fire. Cold-hammer-forged 4140 chromoly steel barrel with 5R rifling at minimum bore and groove dimensions, minimum headspace and centralized chamber. Aerospace-grade 7075-T6 aluminum lower are type-III hardcoat-anodized. Ruger Marksman™ Adjustable Trigger adjusts from 2.25-lb. to 5-lb. pull. Includes two 10-round Magpul PMAG® magazines.
- **Glock Model 43 9mm Auto Pistol** - The Glock 43 is ideal for home defense, concealed carry or as a duty weapon. It is a sub-compact, 9mm, polymer frame handgun that uses a locked breach system referred to as "Safe Action". The frame is made out of a synthetic polymer that weighs in at a little over 17 ounces and has a DAO trigger pull of roughly 5.5 pounds. The 3.4" hexagonal hammer forged barrel of the Glock 43 increases muzzle velocity and provides greater accuracy than conventional rifled barrels.
- **Mossberg ATR .308 "Night Train" Bolt Action Rifle** - Built on the basic 100 ATR short action, the Night Train comes standard with a Picatinny rail for the ultimate in scope mounting versatility, and a factory mounted and bore sighted 4-16x50mm variable scope with sunshade. Other features further adding to the Night Train's incredible value are a folding bi-pod, flip open lens protectors, and a heavy duty nylon sling. With features and accuracy matching tactical rifles costing two and three times more, the new 100n ATR Night Train is the one to beat.
